

Delivering seamless
payment experience

PRODUCT OFFERINGS

Payment Switch

Our robust UPI solution in adherence to the NPCI guideline manages consistent and incremental demand through highly scalable micro services managing high TPS, best possible uptime and consistent product upgrade. We have built a full stack UPI solution that enables banks and fintech to generate better ROI compared to vanilla UPI switch in Industry.

Our IMPS switch synchronizes bank server data with NPCI switch and processes immediate payments! Our platform is being used by one of the large-scale PSU banks and two of the largest Regional Rural Banks in India on a completely end-to-end model including development, AMC and FMS.

Payment Switch
